c) Questions:

Please answer the questions for your judicial system drawing, to the extent possible, on 
your own actual experiences.

0. Preliminary Question: Are there any aspects [see a) above] missing regarding our topic for 
this year, which should be treated? 
No.

1. Please specify – in note form – your case allocation system (in particular who is responsible 
for case allocation and how it is done, whether account is taken of any special abilities or 
interests of the judge and how the appearance of impartiality or neutrality is maintained). 
What are the advantages of your system? What are shortcomings of the system, especially 
regarding judicial independence? 
In Yerevan district courts the allocation is done by computer selection. In Regional Courts it’s up to the Chairman of a Court. The computer selecting is more closer to independence.

2. What measures to increase output and/or diminish handling time are in use or planned in 
your Courts? 
How do these measures affect judicial independence? 
It’s up to the Court and Court Chairman.

3. Do you have performance appraisal, regarding quality or quantity of judicial work 
performed? What are the advantages of these measures? What are 
disadvantages/shortcomings, especially regarding judicial independence? 
It is a function of the Judicial department of Armenia. After that measures the courts classified according to degrees.

4. Please identify shortcomings of the actual working conditions? What are positive effects of 
measures taken, regarding working conditions? 
[Please take into consideration the different aspects mentioned above at a) 4.] 
The quantity of judges and the staff is less, they work overload, which is which brings dispensation of terms.
