

Declaration

We are observing with great concern and opposing further actions by the authorities against prosecutors and judges who take a critical stance against the systematic subordination of the prosecutor's office and courts to the politicians.

Such actions include sending certain prosecutors to places that are very distant from their place of residence and instituting proceedings against judges who consider appeals against such decisions.

We also consistently upholding the position expressed in many judgments of the Supreme Court that there are no grounds for adjudication by the Disciplinary Chamber, including in cases regarding the immunity of judges.

In view of the refusal to call a General Assembly of Judges of the Supreme Court since June 2020, this declaration is the only form in which we can comment on this socially important issue.
